Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1616

Claims 1-34 are pending in this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25 and 34, drawn to a medicament comprising super-oxidized water based on hypochlorous acid and a hydrobath thereof, classified in class 424, subclasses 661-665, class 422, subclass 37, class 252, subclass 187.1+.
- II. Claims 30-31, drawn to method of preparing a medicament of super-oxidized water based on hypochlorous acid by electrolysis of saline, classified in class 205, subclasses 334+, 701.
- III. Claims 26-29, 32 and 33, drawn to a method for treating a human or animal body comprising administering a super-oxidized water based on hypochlorous acid, class 424, subclasses 661-665.

The three inventions as set forth above are each distinct over the others. Inventions of Group I and Group III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process, such as in hard surface sterilization.

Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as

Art Unit: 1616

claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product ("super-oxidized water based on hypochlorous acid") can be made by a materially different process, such as by ozonating a hypochlorous acid solution or by using a separated chamber wherein only cathodic or anodic water is collected and separately used.

Further, to search and examine more than one invention would place an undue burden on the Examiner if the restriction were not required. The prior art relevant to oxychlorine species containing solutions is vast; add to that the additional consideration of electrolysis and/or human therapy, and the search and review burden is serious. The search fields are divergent and review consideration of each prior art must be separate and distinct.

Therefore, for the reasons of distinctness and undue burden, the restriction requirement as set forth above is deemed proper.

A telephone call was made to Mr. Schwarze on 6/26/03 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
